Professional Summary

Computer Science (AI) undergraduate with a strong focus on Frontend Development and core programming fundamentals. Passionate about building scalable, performance-driven web applications using modern technologies. Adept at applying logical thinking, problem-solving skills, and efficient coding practices to develop user-centric solutions. Continuously exploring new tools and frameworks to enhance development capabilities and stay aligned with industry trends. Skilled in creating responsive interface optimizing application performance, and writing clean, maintainable code.

Experience

Super-Image-Resolution using GANs

[Project Link](#)

Python

- Developed a deep learning-based image enhancement project using Generative Adversarial Networks (GANs) to convert low-resolution images into high-resolution outputs with improved visual quality.
- Implemented the SRGAN architecture, consisting of a generator and discriminator model, where the generator creates enhanced images and the discriminator evaluates their realism to improve output quality through training.
- Explored how deep learning improves image quality compared to traditional interpolation methods, which often produce blurry results.

Productivity Dashboard

[Project Link](#)

Frontend Project

- Developed a browser-based productivity dashboard using HTML, CSS, and JavaScript, focusing on applying core concepts like DOM manipulation to dynamically update UI elements such as time and user information without requiring page reloads.
- Integrated external APIs using async/await to fetch and display real-time data like weather updates, while implementing basic error handling and loading states to manage asynchronous behavior effectively.

MacOS Inspired Web Desktop

[Project Link](#)

React.js

- Developed a macOS-inspired desktop interface using React, implementing draggable windows, app lifecycle management, and interactive UI components.
- Implemented dynamic UI behavior including window focus handling, animations, and state-driven component rendering for a seamless user experience.

Education

Greater Noida Institute of Technology, AKTU	B.Tech (CSE - AI)	October 2023 – July 2027
Mother Khazani Convent School, 12th CBSE	Science Stream	March 2023 - 8 CGPA

Skills

Programming Languages	JavaScript, Python, C++
Web Development	HTML5, CSS3, SCSS, Tailwind CSS
Frontend Libraries	React.js, GSAP.js, Locomotive
Database	MySQL
Version Control	Git & GitHub

Certificates & Honors

- Google Study Jams – Google Developers Group on Campus
- Frontend Development – Shreyians Coding School
- Student Development on C Programming – E & ICT Academy, IIT Kanpur
- Associate Member – GDG on Campus GNIOT
- Qualified + Silver in NPTEL – Joy of Computing using Python
