Harsh Sharma

New Delhi, India • mailittoharsh@gmail.com • +91 9871222822 • LinkedIn • GitHub

Professional Summary

Computer Science (AI) undergraduate with a strong focus on **Full-Stack Development** and core programming fundamentals. Passionate about building scalable, performance-driven web applications using modern technologies. Adept at applying logical thinking, problem-solving skills, and efficient coding practices to develop user-centric solutions. Skilled in creating responsive interfaces, optimizing application performance, and writing clean, maintainable code.

Projects

Super-Image-Resolution using GANs Project Link

- Developed a deep learning-based image enhancement project using **Generative Adversarial Networks (GANs)** to convert low-resolution images into high-resolution outputs with improved visual quality.
- Implemented the **SRGAN architecture**, consisting of a generator and discriminator model, where the generator creates enhanced images and the discriminator evaluates their realism to improve output quality through training.
- Explored how deep learning improves image quality compared to traditional interpolation methods, which often produce blurry results.

Finite Project Link

- Developed and deployed a full-stack Instagram clone using **React.js, Node.js, Express.js, and MongoDB**, implementing **RESTful APIs** for authentication, posts, likes, and user interactions.
- Built a distraction-free social feed with reusable React components and image-focused content, integrating frontend–backend communication and deploying the application on Render.

MacOS Inspired Web Desktop Project Link

- Developed a macOS-inspired desktop interface using **React**, implementing draggable windows, app lifecycle management, and interactive UI components.
- Implemented dynamic UI behavior including window focus handling, animations, and state-driven component rendering for a seamless user experience.

Education

Greater Noida Institute of Technology, AKTU **October 2023 – July 2027**
B.Tech – Computer Science & Engineering (Artificial Intelligence)

Skills

Programming Languages	JavaScript, Python, C++
Web Development	HTML5, CSS3, SCSS, Tailwind CSS
Frontend Libraries	React.js, GSAP.js, Three.js
Backend Stack	Node.js, Express.js, Mongoose
Tools	Git, GitHub, Postman, MongoDB Compass

Certificates & Honors

- Google Study Jams – Google Developers Group on Campus
- Frontend Development – Shreyians Coding School
- Student Development on C Programming – E & ICT Academy, IIT Kanpur
- Associate Member – GDG on Campus GNIOT
- Qualified + Silver in NPTEL – Joy of Computing using Python
